The Impact of Nonfamily CEOs on Family Firms' Pursuit of Political Connections: The Theory of Bounded Reliability Perspective

Yang Yu, Tao Bai, Fei Tang, Yulong Liu

[VIEW ARTICLE](#)

Research Questions

- In family firms, how does the presence of a nonfamily CEO impact the firm's likelihood of forming political connections?
- To examine this question, this study attempts to unravel the complex effects of political connections regarding family firms.
- This study seeks to develop a novel perspective on the difference between family CEOs and nonfamily CEOs by drawing on the theory of bounded reliability.

PREVIOUS EDITION

In keeping with FFI's longstanding commitment to the importance of history and narrative for enterprising families, practitioners, and researchers in the field, we are pleased to offer this podcast interview featuring Barnet Schecter, an independent historian whose books include *The Battle for New York: The City at the Heart of the American Revolution*. He is delivering a keynote at the FFI Global Conference in October, entitled "It's A Family Affair: Conquering New York, from Revolution to Rising Seas." We think that this conversation with Jordan Rich is a perfect example of the 2023 conference theme, "Evolving the Conversation: The Future of Family Enterprise Advising and Research."
